DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
The clause regarding "willful false statements ..." required by 37 CFR 1.68 has been omitted.

Claim Rejections - 35 USC § 112

2. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for high molecular weight polymer products, does not reasonably provide enablement for a polymer of the required syndiotacticity having a molecular weight of only 500. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. Claim 1 (and claims 2-9 as dependent thereon) recites only monomers which are polycyclic norbornenes having three or more rings. For a polymer molecular weight of 500, this constitutes a chain of about three monomer units. The specification has been reviewed, but no disclosure of controlling the reaction to make a trimer can be found; the catalytic and process requirements of making ring-opened trimers are substantially different from making higher molecular weight polymers, yet applicants do not appear to have provided any disclosure regarding how to make such small molecules. Furthermore, even if a trimer

could be made, it does not appear to be possible to establish the required racemic structure for an oligomer consisting of only three monomer units.
